

AI Application Development Bootcamp

20 May 2026
Day 8: AI Governance

New AI Governance Roles are created

VP, Senior Audit Manager - Data Governance & AI Audit

OCBC Bank
Singapore

Full-time Professional development

Professional development assistance

AVP/ VP: Data and AI Risk, Risk Management Group

DBS Bank
Central Singapore

Full-time

New

VP, AI & Data Risk Governance

United Overseas Bank
Singapore

Full-time +1

Deputy Director, AI Governance and Safety

IMD Info-communications Media Development...
Pasir Panjang

Full-time

Senior Data Scientist, Model Risk & Data Analytics, Internal Audit

ByteDance
Singapore 048583

Manager/Senior Manager - AI Accelerator and Governance (AIAG)

IRA Inland Revenue Authority of Singapore
Singapore

Full-time

Artificial Intelligence (AI) Ethics and Governance Specialist

MSD
Hybrid work in Singapore

Full-time Shift system

Vice President - VP, Data and AI Governance - Chief Data Office

NOMURA SINGAPORE LIMITED
Singapore

\$12,500 - \$22,500 a month Permanent

VP, AI Ethics & Governance Regulatory Officer

Sumitomo Mitsui Banking Corporation
Singapore

Data & AI Governance Manager

Singtel
Singapore 239732

Learning Outcomes

- Explain why AI needs to be governed
- Explain how AI could be governed in an organization
- Recognize global AI-specific Legislation
- Aware of available AI Risk Assessment Framework

Why Regulate AI?

Bias in AI systems causing harms

AI could be a black box

Responsibility lies in human, not AI

Source: BBC News ([bbc.com](https://www.bbc.com))

Mercy (2025) theatrical release poster. Universal Pictures.

What is AI Governance?

- An organization's approach to using laws, policies, frameworks, practices and processes to help stakeholders manage AI technology use
- Manage associated risks
- Guardrails to address potential issues

How to Govern AI?

Understand which AI Regulation applies, mandatory to comply

Regulations	With effect from	Key Note
The EU AI Act	1 Aug 2024 (and in phases planned till 2023)	Risk-based regulation, key obligations for high-risk AI
South Korea AI Basic Act	22 Jan 2026	Balance AI innovation with ethical safeguards
Japan AI Promotion Act	Sep 2025	High-level principles and national policy direction
US States: Utah AI Policy Act, Colorado AI Act...	1 May 2024, 1 Jan 2027,	Emphasizes transparency, consumer notice, human oversight
China		Not a single unified law, built on network of laws, admin regulations, national standards

And more...

How to Govern AI?

Singapore's Approach:

- Voluntary Frameworks
 - Stay updated: [Artificial Intelligence in Singapore | IMDA](#)
 - [Latest Guideline: Model AI Governance Framework for Agentic AI \(1.78MB\)](#)
- Sector-specific laws
 - Finance>Monetary Authority of Singapore
 - Health>Ministry of Health
 - Legal>Ministry of Law
- International cooperation

How to Govern AI?

Use Risk Assessment Tools :

Framework/Guideline	Description
NIST AI Risk Management Framework (RMF)	Managing risk and incorporating trustworthiness considerations
IEEE 7000-21	sits within IEEE's broader The Institute of Electrical and Electronics Engineers (IEEE) initiative and the P7000 series of standards addressing AI and autonomous systems ethics
HUDERIA	Impact Assessment tool, Based on Council of Europe's standards
ISO 42001:2023	AI management Systems
ISO 42005	AI System Impact Assessment

And more...

Risk Level

- **Prohibited/Unacceptable Risks:**

- Certain Biometric app: EU bans Real-time facial recognition in public spaces
- Behavioral manipulation
- Social Scoring or profiling
- Emotional recognition in sensitive settings
- Specific predictive policing

- **High-Risk:** Affect people's rights, safety, or access to essential services

- **Limited or Transparent Risk:** Chatbots (Users must be informed they are interacting with AI), Image/video/audio (AI output must be labelled)

- **Minimal or No Risk:** AI spellcheck, spam filters
